About us

Staking is when you lock crypto assets for a set period of time to help support the operation of a blockchain. In return for staking your crypto, you earn more cryptocurrency. Many blockchains use a proof of stake consensus mechanism. Staked operates the most secure, performant, and cost-effective block production nodes for decentralized PoS protocols on behalf of institutional investors. Our multi-tier signing and listening node architecture delivers stakeholders the ideal combination of security, scalability and decentralization.

Vision

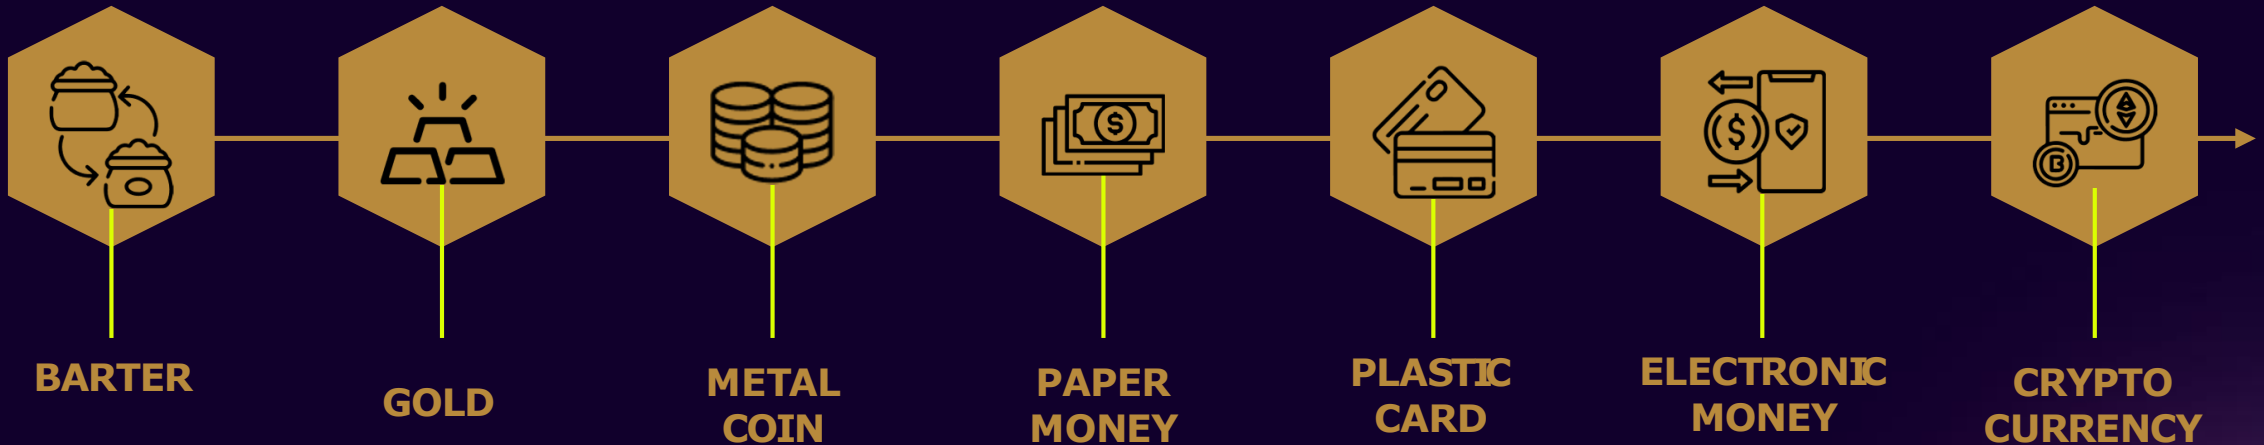

The core aim is to ensure network security. The locked coins, or "stakes", act as a commitment to the network's well-being. maintains custody. Direct participation network security.

Mission

What are mission and vision statements? A mission statement defines the organization's business, its objectives, and how it will reach these objectives. A vision statement details where the organization aspires to go. Why does your company exist? What do you hope to accomplish in the next several years?

What is crypto trading

What are Cryptocurrencies?

Cryptocurrencies are digital tokens. They are a type of digital currency that allows people to make payments directly to each other through an online system.

Cryptocurrencies have no legislated or intrinsic value; they are simply worth what people are willing to pay for them in the market.

WHAT IS SHARE MARKET

A stock market, equity market, or share market is where people buy and sell stocks. The share market serves as a platform for investors to participate in the growth of companies, diversify their portfolios, and potentially earn returns on their investments. Of the two, "stocks" is the more general, generic term. It is often used to describe a slice of ownership of one or more companies. In contrast, in common parlance, "shares" has a more specific meaning: It often refers to the ownership of a particular company.

Staking in blockchain

Staking is when you lock crypto assets for a set period of time to help support the operation of a blockchain. In return for staking your crypto, you earn more cryptocurrency. Many blockchains use a proof of stake consensus mechanism.

What is On-chain staking? On-chain staking utilizes blockchain Proof-of-Stake protocol to generate rewards through a process typically called “staking”. Benefits of On-chain staking on Kraken versus staking on other platforms: ✓

- Start earning rewards instantly — no waiting or bonding periods.
